EDUCATION

Fordham University Graduate School of Arts and Sciences, New York, NY

Expected December 2027

Master of Science in Data Science

GPA 4.0

Fordham University, New York, NY

Expected December 2026

Bachelor of Science in Computer Science

GPA 3.97

Awards: Alpha Sigma Nu, City Council Citation for Robotics, Computer Science & Engineering Technology Seal, Community Service Award, FTC World Championship Division Finalists, Loyola Scholar, Dean's List Award

Relevant Coursework: Data Mining, Info and Data Management, Computer Organization, Database Systems, and Networks

TECHNICAL SKILLS

Languages: C/C++, Java, JavaScript, Python, SQL, basic HTML, CSS, TypeScript

Software and OS: XCode, Android Studio, Digital Circuit Design, Arduino, OnShape, Streamlit, Svelte, GitHub, Visual Studio

WORK EXPERIENCE

Quality Assurance Intern, Public Affairs Department, Fordham University, New York

August 2023 - Present

- Test and ensure the quality of the university's website through Terminal 4 using JavaScript, HTML, and CSS.
- Collaborate with the Assistant Director and marketing team to improve Fordham's website and social media.

Data Science Intern, DAAD RISE Internship, Dortmund, Germany

May 2025 - August 2025

- Developed a reliable forecasting model incorporating time series clustering and characterization, forecast model selection, and calculation of reliable forecast accuracy KPIs using data analysis and data visualization in Python.

Software Engineer Job Simulation, Forage: JPMorgan Chase & Co., New York

February 2024 - May 2024

- Remotely completed tasks on Forage focused on interfacing with a stock price data feed, fixing scripts, and manipulating financial data using Python, Git, React, and TypeScript.

Mentor & Team Captain, First Tech Challenge Robotics Team, Metrobotics FTC 14212, New York

September 2019 - June 2023

- Ranked Division finalists at FTC World Championships (ranked #1 in NYC and #32 in the world out of 6,000 teams).
- Arranged meetings with Google, NASA, and FDNY Robotics to learn more about the robotics field.
- Organized STEM community events (workshops for high school and middle school students, STEM days, FTC scrimmages)

LEADERSHIP DEVELOPMENT

Hackathon Director, Computer Science Club, Fordham University, NY

January 2025 - Present

- Oversee planning of large-scale projects, including annual hackathon, team coordination, budget, logistics, and scheduling.
- Manage industry partnerships and sponsorships, as well as organize technical workshops for participants.

General Assembly Delegate, Model United Nations, Fordham University, NY

March 2024 - Present

- Represented assigned countries at UCLA (LAMUN), Boston University (BARMUN), Harvard University (HNMUN), UC Berkeley, and NYU Conferences, engaging in competitive debate focused on cybersecurity, digital rights & AI governance.
- Led negotiations and drafted policy-driven working papers emphasizing digital education, digital evidence, and cooperation.

Undergraduate Representative, Cybersecurity Club, Fordham University, NY

December 2023 - Present

- Execute engaging cybersecurity workshops with guest speakers from IBM, Google, and KPMG with over 100 participants.
- Spearheaded club outreach and recruitment initiatives through social media, resulting in a 20% increase in membership.

Vice President, Commuting Student Association, Fordham University, NY

October 2023 - Present

- Maintain accurate and detailed records of all meetings and events, ensuring transparent communication within the club.
- Curated innovative events such as "Urban Night" (100+ attendees) and a "Networking Event" (15 internship offers).

PROJECTS

Project, Steampunk Cat-culus, HACKNJIT, New Jersey Institute of Technology, NJ

November 2025

- Integrated a real-time hand gesture recognition system with MediaPipe and OpenCV for an interactive educational game, using Gemini API to generate AI-powered math questions answered by hand gestures.
- Created a game environment in Python and Pygame, using Cloudflare technologies for scalability, demonstrating expertise in game development, innovative problem-solving, and the ability to incorporate advanced technologies

Project, Fashion Faeries, DIVHACKS, Columbia University, NY

October 2024

- Engineered a sustainable fashion recommendation system utilizing machine learning to curate outfits based on Pinterest boards, winning Best MongoDB Implementation and Best in Fashion Track awards.
- Architected a computer vision pipeline with MongoDB authentication, Python-based outfit matching algorithms, and integration with Depop/eBay APIs to promote sustainable clothing resale.

LANGUAGES AND SOFT SKILLS

Languages: Fluent in Russian, Tajik; Intermediate in French, Uzbek

Soft Skills: Adaptability, Communication, Problem-Solving, Time Management, Detail-Oriented, Organized, Critical Thinking
